

ignora® Medius

ignora® Design Bio Fireplaces without chimney

ignoRa® Model Finestro

H.60 L.80 D.20cm. Weight. 30kg

This wall mounted stainless steel bio fireplace is one of our bestsellers, and not without reason. With its really beautiful finish it fits perfectly into every home.. Can be placed in all rooms, indoor or outdoor. Model Finestro is made in 2mm stainless steel with fully welded and polished corners. This is quality at its best.

ignoRa® Model Parvus

H.60 L.80 D.27cm. Weight. 30kg

This exclusive wall mounted bio fireplace fits into every home. The stainless steel shelf floats beautifully in the air, and still gives the atmosphere of a normal fireplace. The double walled heat resistant backside is made of 60mm thick painted steel, and stands in very nice contrast to the curved shelf in stainless steel.

ignoRa® Model Carbo

H.60 L. 80 D.20cm. Weight. 30kg

Model Carbo is the perfect bio fireplace for the modern home, which has limited space. It can be placed on the floor as an open fireplace, or be mounted on the wall with a heat resistant backside. This fireplace is made of stainless steel inside and painted steel outside. Model Carbo can be delivered with heat resistant backside and glass front.

Fireplaces without chimney A dream? – no, a reality

ignoRa®

IGNis = fire

Ohne = without

RAuchabzug = chimney

- Environment friendly
- Installation free
- Chimney free
- Trendy designs
- High quality products
- Indoor and outdoor use

ignoRa® Adamas

ignoRa® Design Bio Fireplaces uses bio alcohol as fuel. Bio alcohol can be produced by many of the nature's own organic and environment friendly materials, like corn, potatoes amongst others.

Bio alcohol is almost 100% pure, and develops no smoke or dangerous fumes, in the burning process.

This is why they can be used inside without chimney.
